Mr. Pendleton's Name in the House.
We are gratified to see that the new project in receiving consideration from the Press, and that the Committee appointed in Congress are about to report favorably to its adoption.

There have been some who have apprehended that difficulties might arise from giving Cabinet members a place on the floor to explain or defend their policy; that partisan strife might imperil the interests of the country in giving such free play to the inquisition of representatives.

By others it is also claimed that there is the same reason for granting Cabinet officers in the House, as exists in England that there the House of Commons does not make laws but rather they are the necessity of allowing the ministry to defend or explain its policy. It is also claimed that Congress can, through the President, get at all the facts necessary.

According to all these objections the importance due them, there are yet stronger reasons, in our judgment, why this bill should prevail.

Such a measure would reduce executive influence by making it more directly so amenable. Every Cabinet officer, being obliged to answer any question, upon due notice being given, will be more circumspect in his policy in subject to constant inspection. It would be impossible for him to conceal fraud or treason, as was done during the reign of Mr. Buchanan. Another benefit would be that imputations against the Government could be cleared up in a few words if false, and if true they should be confirmed for the interests of the country at large.

This measure would also assist Congress largely in the work of legislation. Especially in this respect are its advantages apparent in a body the members of which are so frequently changed. Their ignorance and inexperience could be readily supplemented by the experience and more correct knowledge of Cabinet officers.

The bill of Mr. Pendleton was prepared after years of careful study. The whole question is whether the influence necessarily exerted by the executive department, shall be exerted by open, fair legislation, depending on the character and capacity of the Secretaries, or whether that influence shall be exerted secretly, often with open fraud. Secretaries brought upon the floor will have an opportunity of expressing themselves on their policy, in their own way and in their own language. On the whole we are disposed to think it would be a measure of great practical good to the country.

There is a provision in the rebel constitution for bringing Cabinet officers before the House, but such is the tyranny of Jeff. Davis and the rottenness of the Government, that that Provision has not been enlightened by any revelations from the rebel Secretaries.

This measure is, however, one of long standing in Europe, and we believe the times have come when the experiment should be made in our own country.

The Fremont Campaign.
The following are the principles of the platform laid down by the meeting in New York, which nominated General Fremont for the Presidency on the 22d:

A vigorous, consistent, concentrated prosecution of the war against the insurgent armies in the field; with adequate penalties for treason, and an amnesty except to absolute submission.

The right of Suffrage to be regulated by legislative bodies, and not prescribed by the Executive.

No restoration of civil rights as an inducement to rebels to forswear themselves. No initiation of secession by attaching the person of the laborer to the soil.

Absolute equality of all men before the law, without distinction of race or color.

Extension of the beneficent principles of the Homestead Law; and a liberal distribution of bounty lands among all soldiers.

Permanently and absolutely to oppose to the nation the doctrine of the doctrine of secession.

The rigid maintenance of the Monroe Doctrine, so as to vindicate the republican integrity of the Continent.

A reform and thoroughly American foreign policy without regard to the opinions or measures of Foreign Powers.

A liberal system of foreign immigration.

The one-term principle for the Presidency, so as to secure the integrity of the incumbent all the last hour of his office, and prevent the distribution of his patronage for the subjugation of the constituency by officeholders.

Honors Greeley, who was present, and called upon for a speech, deprecated the opening of the Presidential contest as premature, declared himself friendly to all the gentlemen named as Union candidates, and said that he should give his enthusiastic and hearty support to the nominee of the National Convention, wherever it was.

Channel Packet Line between Youngstown
We learn that the New Castle Packet Company are about to run a daily line between that point and Youngstown, the line to consist of two newly fitted up packets. One boat will leave each port every morning and evening, on the arrival of the train; or, rather, the boat for Youngstown will leave New Castle and get to Youngstown in time to connect with the train from Pittsburgh, going to Youngstown, and then to the West.

Passengers can also leave Youngstown on the evening of the arrival of the express train, and be in Pittsburgh by ten o'clock the next morning, and leaving Pittsburgh at 8 o'clock P. M., arrive in Youngstown by daylight next morning. The first boat under this new arrangement will leave New Castle this (Thursday) evening, and reach Youngstown Friday morning.

This will be the quickest, cheapest and most comfortable route for passengers traveling between Youngstown and Pittsburgh. **Making Register.**

LETTER FROM CHATTANOOGA.

To the Front—A Rebel Advance—Disease in Chattanooga—The Fortification—The Rebel Battery—The 10th Ohio Cavalry—The 1st Ohio Sharpshooters—Various Things.

CHATTANOOGA, March 17.
TO THE FRONT.
Mounted on a huge "baste," expatriated with all the gay trappings of a full-blown warrior, your correspondent started out this morning for the purpose of visiting our advance lines, which have been materially changed since Palmer's famous reconnaissance, that resulted as like a general, in a prosy general of congratulation for what was not accomplished. After Palmer "fell" of the enemy and got his clumsy hands buried by his inexperience awkwardness, our forces were suddenly withdrawn from Tunnel Hill, and our lines contracted, so that they now only include Ringgold, Chickamauga battle-field, and Ringgold, instead of being within a few miles of Dalton, as reported. The position now occupied by our troops is a very advantageous one for offensive or defensive operations, and extends a sufficient distance eastwardly to protect the celebrated railway triangle that gives this place its great military importance. There is no probability that this army will be able to make a permanent forward movement for several weeks hence, owing to the lack of transportation facilities, and the small number of animals that died of starvation last winter, and the immense amount of transportation destroyed by the enemy has not been replaced, I am told that it is very difficult to obtain horses and mules from the North, even at the round prices paid by the government; therefore an early spring campaign in this Department need not be expected. Scouts come in this morning reporting

A REBEL ADVANCE.
In the direction and probably against Ringgold, the rebel advance is corroborated by the intense activity manifested by the enemy's cavalry at various points along the front. Two furious demonstrations were made on Taylor's Ridge, which were repulsed and the rebels severely punished for their audacity by the 10th Ohio Cavalry, and the 1st Ohio Sharpshooters. The indications are certainly that the rebels are making an attempt to re-occupy Chickamauga Valley. The indications are certainly fight, though it is a problem that will be solved before this reaches you.

CHATTANOOGA.
It is surprising that disease does not run riot in this unhealthy filthy place. The streets are literally clogged with putrescent matter, and the air is so thick with the odor of decay that it is almost impossible to breathe. The streets are so filthy that it is almost impossible to walk in them. The streets are so filthy that it is almost impossible to walk in them. The streets are so filthy that it is almost impossible to walk in them.

Interesting Stories from Fugitive Negroes.
Incidents of deep and strange interest often happen at the mouth of the Savannah. Romance cannot rival some of the facts.

On the last inst. one of our sentinels thought he heard a cry for help floating down from up the river. "Come and get me!" was the cry, faint voice that came for more than two miles across the water from an island of mud and grass. The sentinels started, and the cry was repeated. A boat was dispatched which brought in three bearded, starved colored men. These reported that they had been driven from their homes by a small party of rebels. A second boat was sent out, which, after hours of search, ventured close to the enemy's lines, rescued the periled and destitute company. These refugees were a party of colored men, the women having only thin miserable skirts that reached their knees, bearded with mud, as one said, "hoggy as dog eeg eeg" famished and wholly exhausted.

For nine weary days and fearful nights they had been floating their perilous way down the river, twelve miles beyond Savannah, through the rebel bivouacs and lines, wading through swamps, skulking through forests, and swimming three rivers, the women clinging to the necks of the men, as they said, "like dead alligators." They discovered the dead stars and stripes floating over Fort Pulaski, the original party consisted of twelve, four of them being women. The famished and desperate night was consuming their last morsel of food when they decried our passage flag. One of them said, "when I see that flag I fill me right up." What a compliment from the human soul to our standard! "Honor and glory to the Union," they cried, "liberty to the slave, and peace to the world." They were not the slaves of indifference to freedom. But miles of distance and the swift flowing Savannah still divided them from help and safety. The wind buffeted their uplifted voices.

One night of hunger, nakedness and peril was before them on their island of mud, where they were to their waists. Before the sun went down they saw a steamer visit the fort, and hope for help. They saw her leave the fort and disappear from view on her way towards Fort Royal. Their hearts began to fail them. One remarked, "When I see that flag I fill me right up." What a compliment from the human soul to our standard! "Honor and glory to the Union," they cried, "liberty to the slave, and peace to the world." They were not the slaves of indifference to freedom. But miles of distance and the swift flowing Savannah still divided them from help and safety. The wind buffeted their uplifted voices.

THE GARRISON.
Silently but steadily the work on the fortresses that surround this city has progressed during the entire winter, and now have arrived at near perfection as the material in the hands of the workmen would admit. Chattanooga with its present armament of the General Sherman, a thorough officer, will see the imperative necessity of fortifying, burning the dead mules and horses and cleaning the city of the foul reek that soon will engender disease at wholesale.

PROCLAMATION.

PROCLAMATION.—IN ACCORDANCE with the Act of Congress, approved April 10, 1862, in relation to the sale of the public lands, the following is published for the information of the public.

THE PALMER TELEGRAPH.
Mr. Spaulding, our Representative in Congress, while attentive in the discharge of his general duties—was also to be seen in the care of the more immediate interests of his constituents. We have noticed that he has introduced and secured the passage of a Resolution instructing the Committee of Commerce, to enquire into the expediency of establishing a Naval Yard and Depot on the southern shore of Lake Erie, and also secured the passage of another Resolution further instructing the same Committee to make enquiry into the duty of appropriations for the Harbor of Cleveland and Fairport Harbor, Ohio.

FOR SALE.
FOR SALE AT COST—THE FAN-CLIPPER.
A new and elegant Fan-clipper, built for the purpose of carrying passengers and freight, and is now for sale at cost. The clipper is built of the best materials, and is fitted with the latest machinery. It is a very fast and comfortable vessel, and is well adapted for the service of the coast. It is now for sale at cost, and is a very desirable investment.

FOR SALE VERY CHEAP—THE RAYMOND.
A new and elegant Raymon, built for the purpose of carrying passengers and freight, and is now for sale very cheap. The Raymon is built of the best materials, and is fitted with the latest machinery. It is a very fast and comfortable vessel, and is well adapted for the service of the coast. It is now for sale very cheap, and is a very desirable investment.

MASTER'S SALE.

MASTER'S SALE.—Pursuant to the command of an order of sale issued from the Court of Common Pleas, for the County of Cuyahoga, Ohio, in and for the case of the said John H. Rogers, Plaintiff, against the said John H. Rogers, Defendant, the following is published for the information of the public.

THE PALMER TELEGRAPH.
Mr. Spaulding, our Representative in Congress, while attentive in the discharge of his general duties—was also to be seen in the care of the more immediate interests of his constituents. We have noticed that he has introduced and secured the passage of a Resolution instructing the Committee of Commerce, to enquire into the expediency of establishing a Naval Yard and Depot on the southern shore of Lake Erie, and also secured the passage of another Resolution further instructing the same Committee to make enquiry into the duty of appropriations for the Harbor of Cleveland and Fairport Harbor, Ohio.
